System Connections

- Connect properly.
Never connect to parts other than the ones indicated in these operating instructions.
- Also refer to the operating instructions of the other products in the system.

Setting the System Switch

Switch to operate from either an Ai-NET compatible head unit or Ai-NET compatible AV head unit connected to this unit. Be sure to set the system switch before fastening the DVA-5210 in place.

1 Disconnect the power plug.

2 Set the system switch at the bottom of this unit with a pointed object.

1:

When connecting to an Ai-NET compatible head unit or Ai-NET compatible AV head unit.

If set to 2, with any of the Ai-NET compatible (AV) head units connected, you may not be able to operate from the head unit, or listen to audio from some external devices, etc.

The factory default is 1.

2:

When connecting to an Ai-NET incompatible head unit or another manufacturer's head unit.

3 Connect the power plug.

System Example

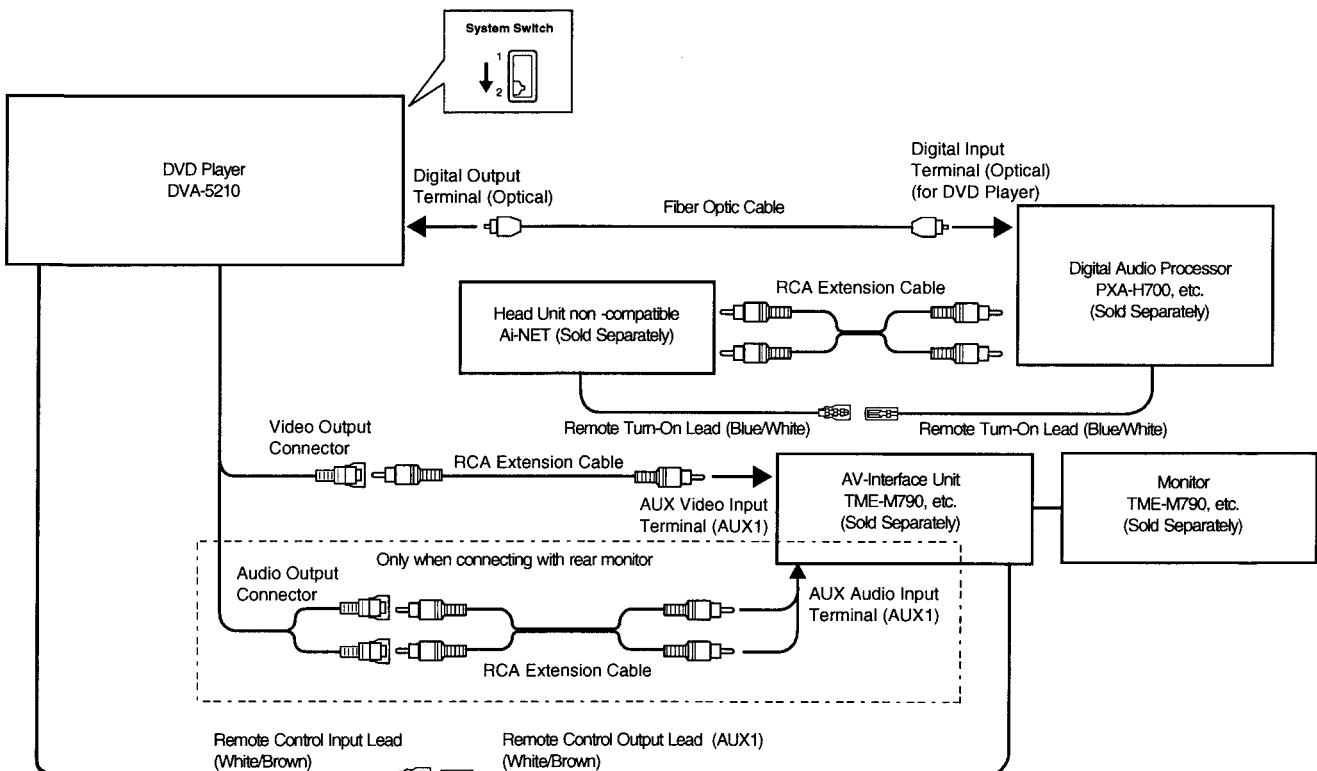

Precautions when Making System Upgrades

- After connections are completed, it will be necessary to change the system settings of the DVA-5210. Before installing the product, please see "Setting the System Switch" on OWNER'S MANUAL and "Setting the Ai-NET" on OWNER'S MANUAL.

When connecting the DVA-5210 to a head unit or Ai-NET compatible AV head unit, do not connect the switched (ignition) power lead.

- When connecting the DVA-5210 to an Alpine TV monitor and Ai-NET compatible AV head unit together, the remote control input cable (white/brown) of both units must be connected. Failing to do so will result in a loss of remote control operation. When making connections to another brand of TV monitor, please use the optional remote control sensor unit.

Connecting a non Ai-NET compatible Head Unit, Digital Audio Processor (PXA-H700, PXA-H900, etc.) and TV Monitor

Setting of DVA-5210

The DVA-5210's system settings must be made after connections are completed. Before fixing the unit in place, refer to "Setting the System Switch" on OWNER'S MANUAL and "Setting the Ai-NET" on OWNER'S MANUAL.

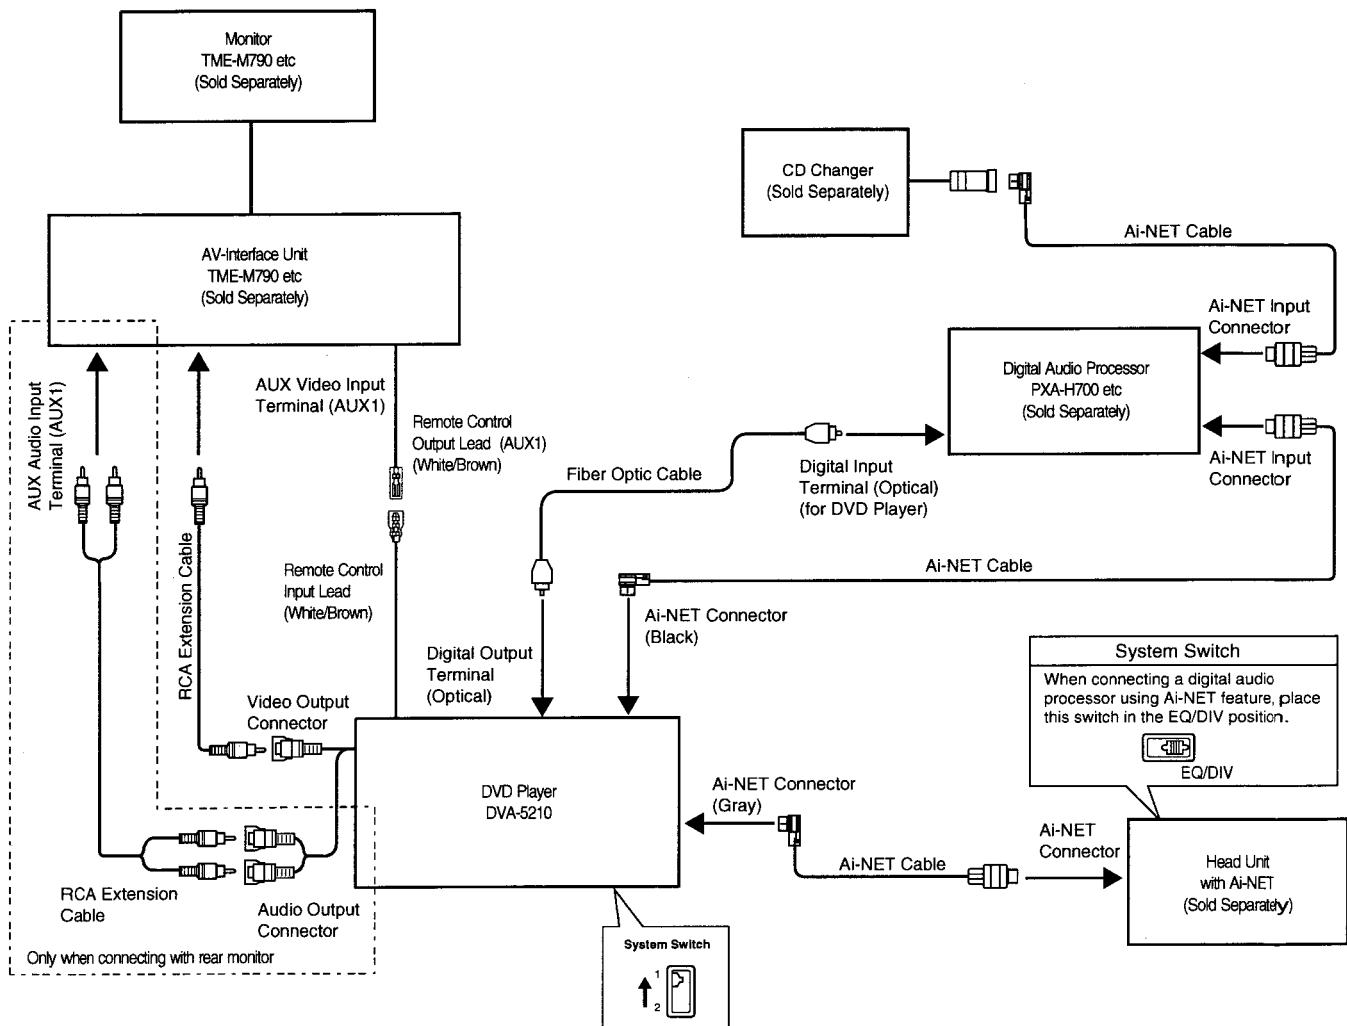

Setting Item	Setting
System switch	2 (ST ANDALONE)
Ai-NET setting	-

- If using in a system with a head unit that is not fully Ai-NET compatible (no processor control) and a digital audio processor, do not connect the head unit's Ai-NET cable. Only connect the DVA-5210 and digital audio processor using an optical fiber cable and its own Ai-NET cable. Use the head unit's analog output (Front or rear) connected to the analog input of the processor.
- When connecting only to a digital audio processor (with a non-Alpine head unit or Alpine head unit without Ai-NET), it is possible to use both an optical fiber cable and an Ai-NET output cable.
- When connecting another brand of TV monitor, there is no need to connect the remote control input cord (white/brown). Use the optional remote control sensor unit.
- Be sure to connect the switched (ignition) power lead.
- Also refer to the operating instructions of the other products in the system.

Please observe the following when using Fiber Optic Cable.

- Do not coil the Fiber Optic smaller than a 30 mm radius.
- Do not place anything on top of the Fiber Optic Cable.

Connecting an Ai-NET compatible Head Unit, Digital Audio Processor (PXA-H700, PXA-H900, etc.) and TV Monitor

Setting of DVA-5210

The DVA-5210's system settings must be made after connections are completed. Before fixing the unit in place, refer to "Setting the System Switch" on OWNER'S MANUAL and "Setting the Ai-NET" on OWNER'S MANUAL.

Ai-NET setting	FULL	TIME

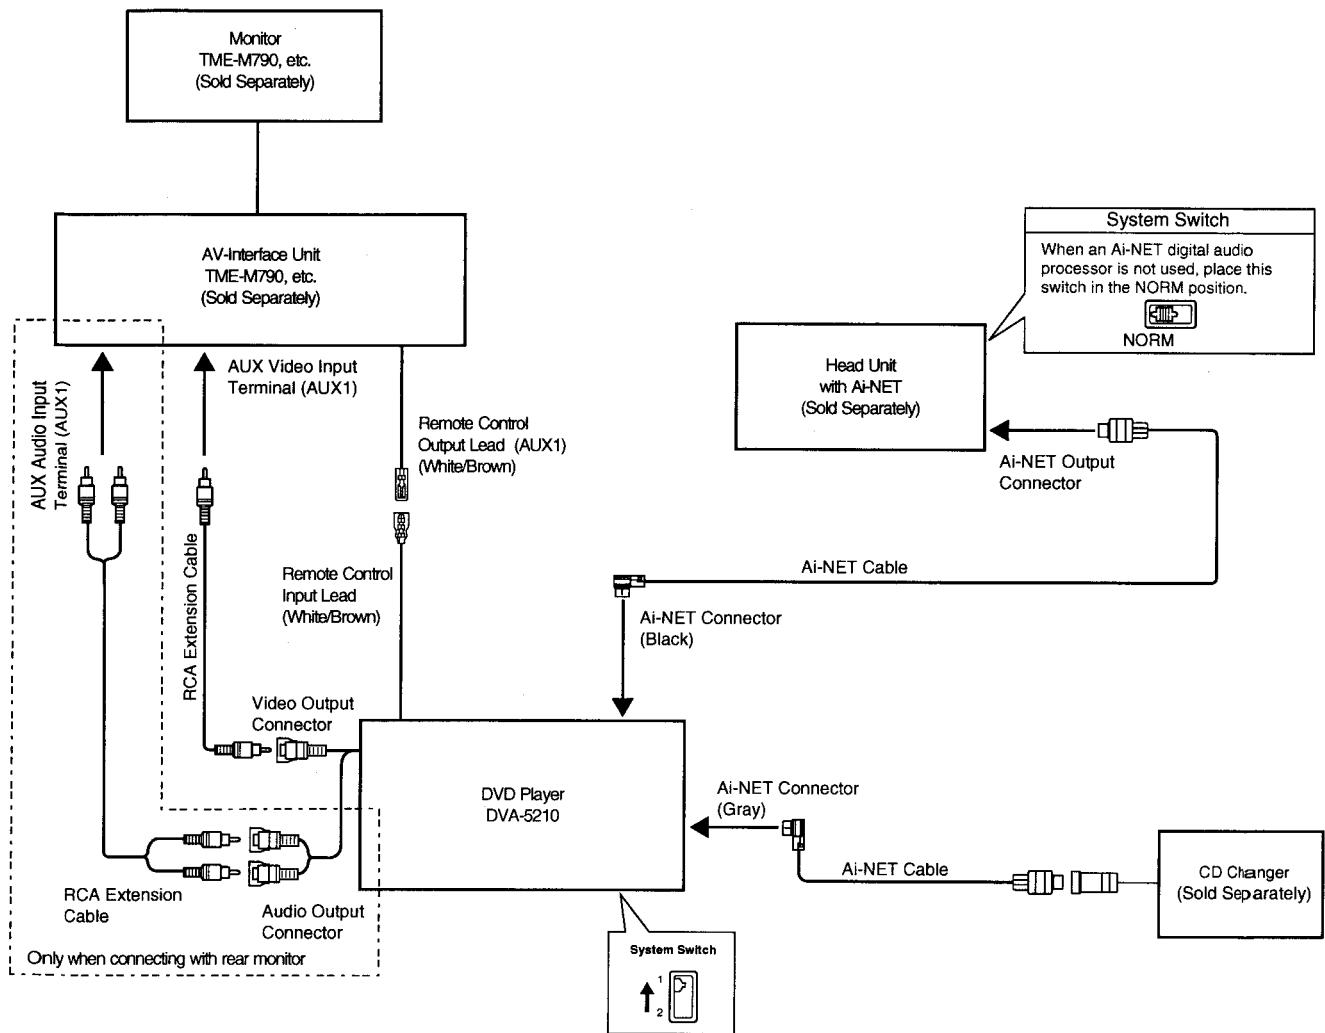

- Be sure to switch the head unit's system switch before turning the power on.
- Also refer to the operating instructions of the other products in the system.
- To connect a rear monitor, connect to the front monitor's RCA output (TV Tuner Box).

Please observe the following when using Fiber Optic Cable.

- Do not coil the Fiber Optic smaller than a 30 mm radius.
- Do not place anything on top of the Fiber Optic Cable.

The switched (ignition) power lead connection is not needed.
